Ezzat Ahmed

Flutter Developer

ezz02879@gmail.com 01055818100 Cairo, Egypt LinkedIn GitHub

PROFILE

Flutter Developer with 3+ years of experience in building scalable cross-platform mobile applications. Delivered multiple production apps published on **Google Play** and the **Apple App Store**, specializing in Clean Architecture, BLoC, REST APIs, payment gateway integration, and high-performance mobile solutions. Experienced in leading development teams and collaborating in Agile environments to deliver reliable, maintainable, and user-focused applications.

TECHNICAL SKILLS

Mobile Development
- Flutter
- Dart
- Responsive & Adaptive UI Development
- Multi-language (Localization) Applications

Architecture & Code Quality
- Clean Architecture
- SOLID Principles
- Design Patterns
- Dependency Injection
- GetIt

State Management
- Bloc / Cubit

APIs & Networking
- RESTful APIs Integration
- Dio
- Retrofit
- Firebase Services:
  - Authentication
  - Cloud Firestore
  - Realtime Database
  - Cloud Messaging (Push Notifications)
  - Cloud Storage

Payment Integrations
- Paymob
- Stripe

Maps & Location Services
- Google Maps API
- Places Autocomplete
- Directions API
- Geocoding

Local Storage
- Shared Preferences

Tools & Workflow
- Git & GitHub
- Agile / Scrum

PROFESSIONAL EXPERIENCE

Flutter Developer 06/2026 – Present
Brandomaa – Full Time Cairo,Egypt

- Architected and built customer-facing mobile applications, driver applications, and Flutter Web solutions using Flutter, Clean Architecture, and a feature-based modular structure.
- Built the Driver App focusing on order management, live location tracking, notifications, wallet, profile, and performance analytics modules.
- Developed a responsive Flutter Web application with reusable UI components and adaptive layouts.
- Applied Repository Pattern, Use Cases, and Dependency Injection to improve scalability, maintainability, and code organization.
- Managed app state using BLoC/Cubit with Freezed for immutable and predictable state handling.
- Built a type-safe networking layer using Dio, Retrofit, interceptors, centralized API error handling, and paginated responses.
- Implemented real-time order tracking and live location features using Google Maps, Geolocator, and Geocoding.
- Integrated Firebase Cloud Messaging and local notifications for order updates and real-time user communication.
- Delivered a fully localized Arabic/English RTL-ready UI with responsive layouts, skeleton loading states, and reusable UI components.

Tech Stack: Clean Architecture • BLoC • Freezed • Dio • Retrofit • Google Maps • Hive • GitHub

Flutter Developer 07/2023 – 11/2024
Silver Triangle - Full Time Giza, Egypt

- Developed scalable cross-platform mobile applications using Flutter and Clean Architecture.
- Integrated REST APIs and Firebase services to support real-time data synchronization.
- Implemented secure payment gateway integration, including Fawry.
- Built responsive and adaptive user interfaces for multiple screen sizes.
- Applied BLoC/Cubit state management to improve code maintainability and scalability.
- Collaborated with backend and UI/UX teams to deliver high-quality production applications.

Tech Stack: Cubit • Firebase • REST APIs • Fawry • GoogleMaps • GitHub

Flutter Team Leader 05/2024 – 06/2026
Selivery - Full Time Cairo, Egypt

- Led the development of customer and driver mobile applications using Flutter.
- Designed scalable application architecture following Clean Architecture principles.
- Planned and managed feature implementation, task distribution, and development workflow.
- Conducted code reviews and mentored team members to maintain high code quality.
- Collaborated with backend, UI/UX, and QA teams throughout Agile development cycles.
- Implemented transportation features, trip management, and notification systems.

- Mentored Flutter developers and participated in architectural decisions to ensure code quality and maintainability.

Tech Stack: Cubit • REST APIs • Google Maps • GitHub

Flutter Developer 06/2024 – 09/2024
Yalla - Part Time Cairo, Egypt

- Developed production-ready mobile features and reusable UI components.
- Integrated backend REST APIs and optimized application performance.
- Collaborated with designers and backend developers to deliver new features.
- Improved application responsiveness and overall user experience.

Tech Stack: Clean Architecture • REST APIs • GitHub

Flutter Developer 06/2025 – 10/2025
Mixcode - Remotely Giza, Egypt

- Developed and maintained cross-platform mobile applications using Flutter.
- Integrated third-party APIs and optimized application performance.
- Collaborated remotely with the development team using Agile methodology and ClickUp.
- Contributed to writing clean, maintainable, and reusable code.

Tech Stack: REST APIs • Google Maps • GitHub • ClickUp

PROJECTS

Doctor Box Driver
Driver delivery application developed for Brandomaa to manage orders, live tracking, wallet, notifications, profile, and performance analytics.
- **Key Features:** Order management • Live location tracking • Wallet • Notifications • Profile • Performance analytics
- **Tech Stack:** Flutter • Clean Architecture • BLoC/Cubit • Dio • Retrofit • Google Maps • Hive • REST APIs

Doctor Box Website
Responsive Flutter Web application developed for Brandomaa to support the Doctor Box platform with reusable UI components and adaptive layouts.
- **Key Features:** Responsive Flutter Web UI • Reusable components • Adaptive layouts
- **Tech Stack:** Flutter Web • Flutter • Dart • Clean Architecture • Responsive UI • REST APIs • GitHub

Mosaada
Roadside assistance platform in the UAE connecting drivers with towing and nearby service providers.
- **Key Features:** Towing requests • Real-time location sharing • Nearby providers • Provider verification
- **Tech Stack:** Flutter • Google Maps • REST APIs

E-Shop
E-commerce mobile application for browsing products, secure checkout, personalized recommendations, and order tracking.
- **Key Features:** Product filtering • Secure payments Recommendations • Real-time order tracking
- **Tech Stack:** Flutter • REST APIs

TripU
Ride-hailing mobile application for booking trips, tracking drivers in real time, estimating fares, and managing scheduled rides.
- **Key Features:** Real-time GPS tracking • Fare estimation • Scheduled rides • Favorite drivers • Emergency alerts • In-app support chat

- **Tech Stack:** Flutter • Firebase • Google Maps API • REST APIs

TripU Captain
Driver companion application for managing ride requests, navigation, earnings, customer ratings, and emergency assistance.
- **Key Features:** Real-time ride requests • GPS navigation • Earnings dashboard • Ratings & reviews • Emergency assistance
- **Tech Stack:** Flutter • Firebase • Google Maps API • REST APIs

Selivery Client
Transportation booking application for customers to request direct, hourly, and daily trips with real-time tracking.
- **Key Features:** Trip booking • Vehicle selection • Booking flow • Trip tracking • Responsive UI
- **Tech Stack:** Flutter • Firebase • Google Maps API • REST APIs

Selivery Driver
Driver application for receiving trips, managing availability, handling ride status updates, and trip operations.
- **Key Features:** Trip requests • Availability management • Ride status updates • Notifications • Driver operations UI
- **Tech Stack:** Flutter • Firebase • Google Maps API • REST APIs

ADDITIONAL STRENGTHS

• Strong problem-solving and debugging skills
• Production-level mobile application development
• App publishing experience on Google Play and Apple App Store
• Code review and team collaboration
• Agile/Scrum development workflow
• Clean, maintainable, and scalable code practices

EDUCATION

Bachelor of Computer Science and Information Systems 09/2021 – 07/2025
New Cairo Academy Cairo, Egypt
